ABSTRACTED-PUB-NO: JP 2001213777 A

BASIC-ABSTRACT:

NOVELTY - An alcoholic drink or alcoholic pickle is obtained by adding alcohol to aqueous solution or powder of vitamin C.

USE - For skin whitening, skin smoothing and removing stain from skin, and also used as hair restorer.

ADVANTAGE - The effect of vitamin C in alcohol is increased by 10-1000 times compared with vitamin C in water. Improved pharmacological effect of vitamin C is achieved in short time by adding alcohol to vitamin C. Baldness is treated effectively and thick hair with fall of downy hair is experienced and region affected by herpes zoster is also treated effectively. Decomposition of melanin, collagen growth effect and leucocyte growth effect are excellent. The alcoholic

drink relieves cold and low back pain. The pharmacological effect of vitamin C is due to degradation of melanin, enhancement in collagen growth effect, and leucocyte (macrophage/interferon) growth effect.
